Intelligent Test Automation Platform

What do we Promise?

- 80%**
Cost Saving
in Automation
- 5X**
Increase in
Automation Velocity
- 90%**
Time Saved
in Test Design
- 99.9%**
Reliable
Test Runs
- 50%**
Reduction in
Overall QA Cycle

Why Choose Us?

Enabling engineering teams to ship quality software at scale and speed is at the heart of everything we build at DevAssure.

- ✓ Our integrated approach to test design and automation cuts QA cycles by half, helping you to deliver high-quality software faster leading to improved NPS scores. One of our early B2B SaaS customer has cut their release qualification time from 10 hrs to 5 hrs with in few months of onboarding DevAssure.
- ✓ DevAssure's VS code plugin leverages AI to identify functional bugs in the code while development is in progress drastically improving the code quality in the early stages of SDLC leading to significant time and cost benefits for CXOs.
- ✓ Automated Tests created in DevAssure platform can be run repeatedly with near 100% accuracy results and zero flakiness leading to high confidence releases. Our customers have had near 100 % reliable test runs in their CI pipelines leading to faster on time releases.

How we stand out?

Experience AI-driven automation with a no-code platform and comprehensive tools to simplify even the most complex testing scenarios.

- ✓ AI Powered test case generation and functional code analysis.
- ✓ Integrated no code platform for functional/non functional automation design and execution.
- ✓ Extensive set of inbuilt actions to automate any complex scenarios.
